

ROBIN YANG

BASIC INFO

- ✧ Location: Auckland, New Zealand
- ✧ Phone: (+64) 27 788 6001
- ✧ Email: robinyang029@gmail.com
- ✧ Tech Blog: <https://yrbing.github.io/>
- ✧ Work Experience: 7+ years / Senior Front-end Engineer
- ✧ Visa Status: Open Work Visa (Full working rights in NZ)
- ✧ Availability: Immediately / No Notice Period

PROFESSIONAL SUMMARY

Senior Front-end Engineer with **7+ years** of experience at global tech leaders including **ByteDance (TikTok)** and **Xiaomi**, including **5 years building hybrid mobile applications across mobile web/H5, WeChat mini-apps, and React Native**. Specialise in architecting high-performance web applications across the **React ecosystem**, with a strong focus on seamless UI/UX implementation and platform-scale delivery. **Now based in Auckland and contributing locally through Auckland City Mission while seeking the next senior role in New Zealand's tech sector.**

KEY SKILLS

- Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3 (SCSS, Tailwind CSS, styled-components)
- Frameworks & Libraries: React (Hooks, Context, Router), Next.js, Redux, Zustand, TanStack Query
- Engineering & DevOps: Webpack, Vite, CI/CD (GitLab CI/CD, GitHub Actions), Git Flow, Jest, Docker
- Performance: Core Web Vitals, Chrome DevTools, Bundle Optimization, Code Splitting
- Cross-Platform & Mobile: Hybrid App, JSBridge, React Native, WebView, Mobile Responsive Design
- Backend & Collaboration: Node.js, GraphQL, RESTful APIs, MongoDB, Express/Koa, WebSocket

PROFESSIONAL EXPERIENCE

AUCKLAND CITY MISSION

Auckland, New Zealand

Volunteer Software Engineer

Mar 2026 – Present

Mission Grocer: <https://www.missiongrocer.co.nz/>

Modernised Mission Grocer's Shopify e-commerce infrastructure (Liquid, custom JS/CSS, Shopify CLI), driving end-to-end digital transformation.

- Partnered with the Project Manager in weekly strategy sessions, **translating community needs into technical solutions** and resolving operational bottlenecks.
- Established the organisation's first engineering workflow from scratch, introducing a structured Dev-Review-Release lifecycle with reliable rollback strategies to ensure zero production downtime.
- Leveraged AI-assisted development tools, including **Claude Design** and **Claude Code**, to accelerate feature delivery and maintain code quality.
- Identified a gap in the initial site architecture; proposed, designed, and shipped the About Us, Meet the Team, and FAQ pages to build local community trust and transparency.
- Migrated legacy customer data to Shopify Admin CRM, eliminating manual email collection bottlenecks and unlocking data-driven, personalised lifecycle marketing campaigns.

BYTEDANCE (TikTok)

Beijing, China

Senior Front-end Engineer

Aug 2022 – Aug 2023

Led front-end architecture, UI/UX strategy, and system delivery for Volcengine's enterprise-grade PaaS product, the Distributed Cloud Native Platform (DCP), commercialising ByteDance's cloud-native infrastructure for global B2B clients.

- Appointed Front-end Lead for the DCP Proof of Concept; architected a unified, multi-tenant enterprise management console using **React**, **TypeScript**, and **Node.js**.

- Designed the full **GraphQL** stack, including a Node.js/Apollo Server gateway that aggregates multi-tenant infrastructure metrics across backend services and an Apollo Client cache layer on the front end, cutting dashboard load latency and eliminating redundant REST round-trips.
- Built adaptable front-end interfaces supporting public, private, and hybrid cloud deployment models, integrating cleanly with backend CI/CD pipelines.

Senior Front-end Engineer

Apr 2019 – Aug 2022

Led front-end engineering for Douyin Consumer Finance's in-app hybrid experience (WebView inside the Douyin native shell), serving 10M+ DAU.

- Architected a unified **JSBridge SDK** for H5, ensuring 100% UI consistency in key functions and a 40% gain in development efficiency.
- Spearheaded the legacy migration from **Vue.js** to **React + TypeScript**, boosting feature iteration speed by 35%.
- Optimised First Contentful Paint (FCP) through bundle analysis, code splitting, and tree shaking; combined with Service Workers and HTTP caching to cut initial load time by 40%.
- Built a Node.js production monitoring system with real-time error tracking and anomaly detection on key platform metrics, reducing MTTR by 60%.
- Architected a centralised internal UI library in React and SCSS, translating high-fidelity Figma designs into reusable components and ensuring design consistency across 5+ core products.
- Mentored 5+ junior-to-mid developers and established a standardised end-to-end front-end workflow encompassing RFCs, Code Reviews, and automated CI/CD deployment; consistently earned top-tier performance ratings.

XIAOMI

Beijing, China

Front-end Engineer

Apr 2016 – Apr 2019

- Core developer for Xiaomi EcoCloud, delivering critical management tools and modernising legacy front-end architectures for a B2B cloud computing platform tailored to Xiaomi ecosystem companies.
- Led the structural transition from **AngularJS** to **React**, implementing modular patterns and refactoring core architectures to reduce long-term maintenance overhead; upgraded the build pipeline from Gulp to Webpack.
- Core developer for Xiaomi Youpin's iOS and Android apps in React Native; architected core modules including Product Details, Reviews, and Order Lists, delivering native-level performance and consistent UI across platforms.
- Engineered lightweight cross-platform mini-apps (WeChat's in-app application ecosystem) using Taro, building high-traffic e-commerce campaign pages optimised for fast load and conversion.

Note on Career Timeline: Planned career break from Aug 2023 to Mar 2026 for relocation to New Zealand and personal arrangements.

EDUCATION

BEIJING UNIVERSITY OF POSTS AND TELECOMMUNICATIONS (BUPT)

China

Master of Software Engineering

Sep 2013 – Mar 2016

Bachelor of Software Engineering

Sep 2009 – Jul 2013
